

## HTML/CSS Labs

Over the course of the next two labs, you will be creating a website for a company. The company requires you to develop the site based on the specifications of a designer. You will be given assets to aid you in developing this website.

The website will be built in 2 stages:

1. The first step is creating the basic layout
2. The second step is modifying the website to make it easily accessible on all devices

## HTML/CSS Lab Part One

**Task:** Create a website for the company that will look identical to their design specifications.

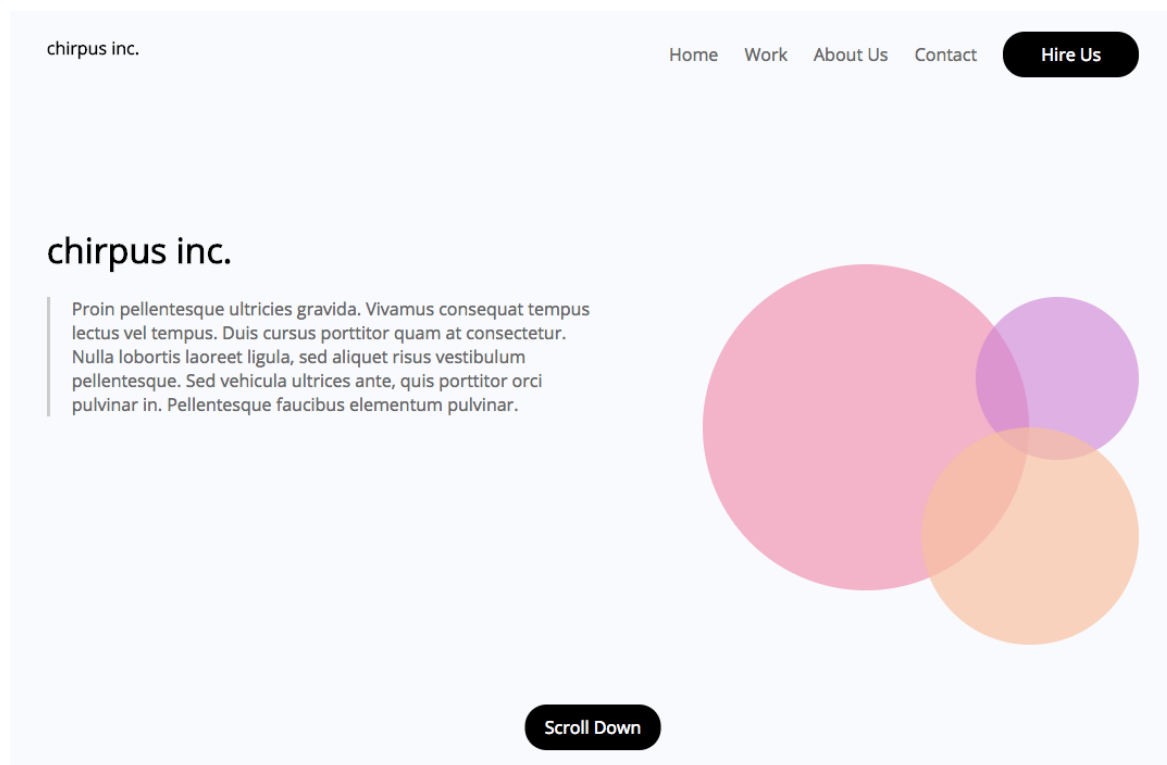

### What does the application do?

1. Displays information about the company.

### Build Specifications:

1. Must be built using the images, colors, fonts, and wireframes given to you by the designer.

## HTML/CSS Lab Part Two

**Task:** You will need to create a second stylesheet that will be used to build the styling mobile-first. You can keep your original HTML.

### What does the application do?

1. Correctly displays the website on multiple devices, allowing users to access it without problems on mobile, tablet, or desktop views.

### Build Specifications:

1. Follow the two wireframes given to you from their designer to make the website look great not just on desktop but on mobile and tablet devices.
